

# Winner: Frame of Mind

**F**rame Of Mind helps hard to reach socially excluded adults with mental health issues and learning disabilities who are often overlooked by mainstream employers. Their training approach means that they do much more than just train people in picture framing, as Theresa Bates explains: "We challenge people's expectations of themselves and help them to achieve many things they would have thought impossible before they joined us."

"It is a pleasure to be given this award, and it has really shown that our training efforts have paid off. This award clearly recognises all the hard work and progress made by all the staff, trainees and volunteers at Frame Of Mind."
